

Introduction:

Eurasian Inspections offers inspection, testing, monitoring and evaluation services. It has more than fifteen years of experience in quality management, plant operations, lab management, logistics & supply chain management, disaster & emergency management and QHSSE consulting. The company has been involved with various industries and sectors including textiles, leather, oil & gas, forestry and environment. Some of our clients include fortune five hundred companies like Supreme Fuels, Nordic Camp Supply and World Fuel Services (NYSE: INT).

Oil & Gas – Logistics:

Eurasian Inspections offers a range of customized services to its clients. It facilitates their business by inspecting materials and products before shipment, testing in laboratories and in inventory monitoring.

Eurasian Inspections has been in business for the past fifteen years. With offices in Lahore, Islamabad and Karachi, the company offers inspection, testing and quality assurance services to companies in various fields of activities. These include textiles (woven, knitted, greigh fabric plus yarn testing), sports goods, surgical and fuel.

Inspection carried out for fuel and other liquid cargos may include; as requested by valued clients:

- Quality inspection, sampling and on the spot analysis.
- Quantity inspection, monitoring and inspection of quantity of liquids such as bulk oil and chemicals.
- Tank lorry inspection, inspection of cleanliness, condition of the tank coating and other tank tests.
- Damage survey.
- Storage and transportation of liquid cargos.

Eurasian has the capability to undertake any testing or inspection required by customers.

For the past 10 years, Eurasian has been involved in pre-inspection, inspection and testing of fuel and vehicles across Pakistan. A pool of trained inspectors and supervisors has been deployed at various oil terminals Keamari, Karachi, the Pak Arab Refinery, Muzaffargarh and Attock Refinery, Rawalpindi. Furthermore, in order to facilitate the tracking of vehicles (carrying the cargo), for our clients we have representatives stationed at major checkpoints.

Environmental Services:

The environment is at the top of the agenda for governments, civil society and citizens, and is likely to remain so for some time. Its importance in business and purchase decision-making, as well as in legislation, standards and regulations is increasing all the time.

As a result, no business can afford to take the environment for granted. Whatever your industry or area of activity, you need to minimize your impact on the environment and protect it as much as possible.

As a leading provider of environment services, we offer testing, sampling, inspection, certification, verification and a comprehensive range of specialist solutions to help you minimize your environmental impact.

We can help you with every aspect of your environmental responsibilities, including:

- Air: We provide a range of highly specialized ambient and indoor air sampling – in the field or at one of our specialist laboratories
- Soil: We offer a variety of environmental drilling, soil and sediment sampling, and geotechnical services
- Water: We conduct independent sampling and analysis of surface water, groundwater, process water, waste water and much more
- Waste: We can help you assess, monitor, reduce and manage your waste products
- Climate change: From testing for micro-pollutants to ensuring compliance with new greenhouse gas emissions regulations, we help you understand and optimize your relationship with the environment, and comply with environmental standards

Eurasian Inspections can provide services to the utmost satisfaction of clients. Eurasian believes in offering quality services with integrity.

A few of our clients have been servicing major contracts from the US Department of Defense and NATO. Some of their other clients include militaries of NATO partner countries, Armed Forces of Germany, Sweden and France, and EUPOL (European Police Force).

Eurasian has alliances and partnership around the world to bring you the best possible solutions:
